Chart 1. Matched Taxable Gross Receipts Per Quarter

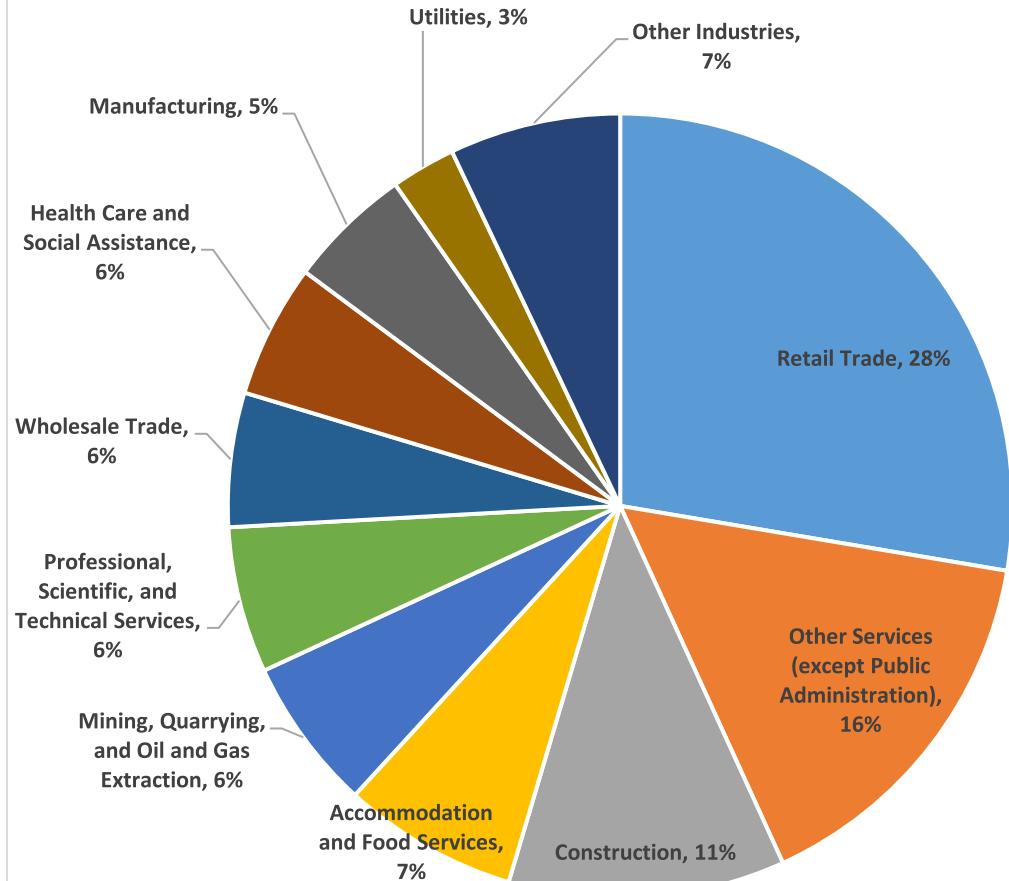

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500)

San Juan County's MTGR has remained relatively stable over the last eight quarters, as seen in Chart 1. In Q3 FY24, the reported MTGR was \$978.9M, an increase of 2.8%, or \$26.8M, from Q2 FY24. As seen in Chart 2, the other services industry was the 2nd largest as a percentage of MTGR, accounting for 16%. This share doubled from the 7% in Q2 FY 24. Table 1 on the next page shows that the county posted a 3% growth in MTGR YOY.

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

In the third quarter of FY24, 27 out of 33 counties reported positive year-over-year (YOY) economic growth, with a statewide 8.5% increase in matched taxable gross receipts (MTGR). Statewide growth was seen across most industry sectors, with construction and professional, scientific, and technical services leading. As inflation remains stubborn, employment, wages, and the number of establishments are up YOY in New Mexico.

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500) and EDD Calculations

The largest contribution to this growth came from the other services industry, whose MTGR doubled in Q3 FY24 compared to Q3 FY23. The transportation and warehousing industry showed negative MTGR in Q3 FY24, possibly due to amended tax filings with TRD.

The quarterly gross receipts tax (GRT) collected during Q3 FY24 (\$13M) was 4.7% more than the amount collected during Q2 FY24 (\$12.4M), as seen in Chart 4. Chart 5 shows that Q2 FY24 total average employment grew by 575, or 1.3%, YOY. Average weekly wages also experienced a YOY increase of \$45, or 4.3%.

Chart 6. Establishment Year Over Year % Change

Source: NMDWS - Quarterly Census of Employment and Wages program and EDD Calculations

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment, and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state, and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Table 2. FY24 - Q2 Employment Data and Establishments by Industry

Industry	Average Employment	YOY Change in Average Employment	Average Weekly Wage	YOY change in Average Weekly Wage	Number of Establishments	YOY Change in Establishments
Accommodation and Food Services	4,644	0.5%	\$ 435	7.7%	228	-3.0%
